

**PLUGR®**

# PL855 Pro HD 30" Aerator

PL855 Pro HD hydrostatic drive aerator has features that no other aerator from any manufacturer can match. From its fingertip speed control knob to its simplified, self-propelled hydrostatic drive system, PL855 Pro HD will provide more productivity per hour, superior aeration results and remarkably low maintenance costs.

Like all PLUGR reciprocating aerators, heat treated, high tensile strength, computer machined tines are driven into even hard soils with the cam action engine power instead of relying on gravity and bulky supplemental weights to result in soil penetration. PL855 Pro HD is especially effective on turf grasses and soils that are soft or spongy where self-propulsion keeps the aerator moving forward at an appropriate aeration speed.

The sleek unibody construction, improved handle ergonomics, improved maintenance access and built-in quick release receiver hitch for an optional StepSavr make the new PL855 Pro HD the best value for the money in the walk-behind power aerator market.

Once you try PL855 Pro HD, you'll never want to own another aerator.

See Optional PL050 StepSavr on Page 14

## BUDDY RODGERS

*Buddy Rodgers & Son Professional Lawn Service Leavenworth, KS*

We pride ourselves in having good equipment and we're constantly upgrading. We've had a PLUGR for years and, because our guys always choose PLUGR over our other aerators, we recently added a PL855. It allows us to slow the machine down and prepare small areas for seeding without dragging out the verticutter.

Model Number	PL855 Pro HD
Effective Aeration Width/Pass	30"
Typical Core Spacing	2.6" x 7.5"
Rated Sq. Ft. Per Hour	Up to 35,000
Core Depth	Up to 2.75"
Minimum Gate Width	34"
Number of Tines	8
Approx. Operating Weight	360#
Engine	Honda GX200 Commercial Grade OHV (Approx. 6.5 HP)
